

Apption's Databricks Launchpad

A battle-tested framework and pre-built set of templates.

WHAT IT IS

A data PoC template and framework for accelerating Databricks projects.

PURPOSE

Streamline development, enforce governance, optimize costs, and ensure production-readiness.

WHO IT'S FOR

Data teams and organizations looking to scale from experimentation to production.

Why Databricks Launchpad?

Launchpad helps you focus on your critical path

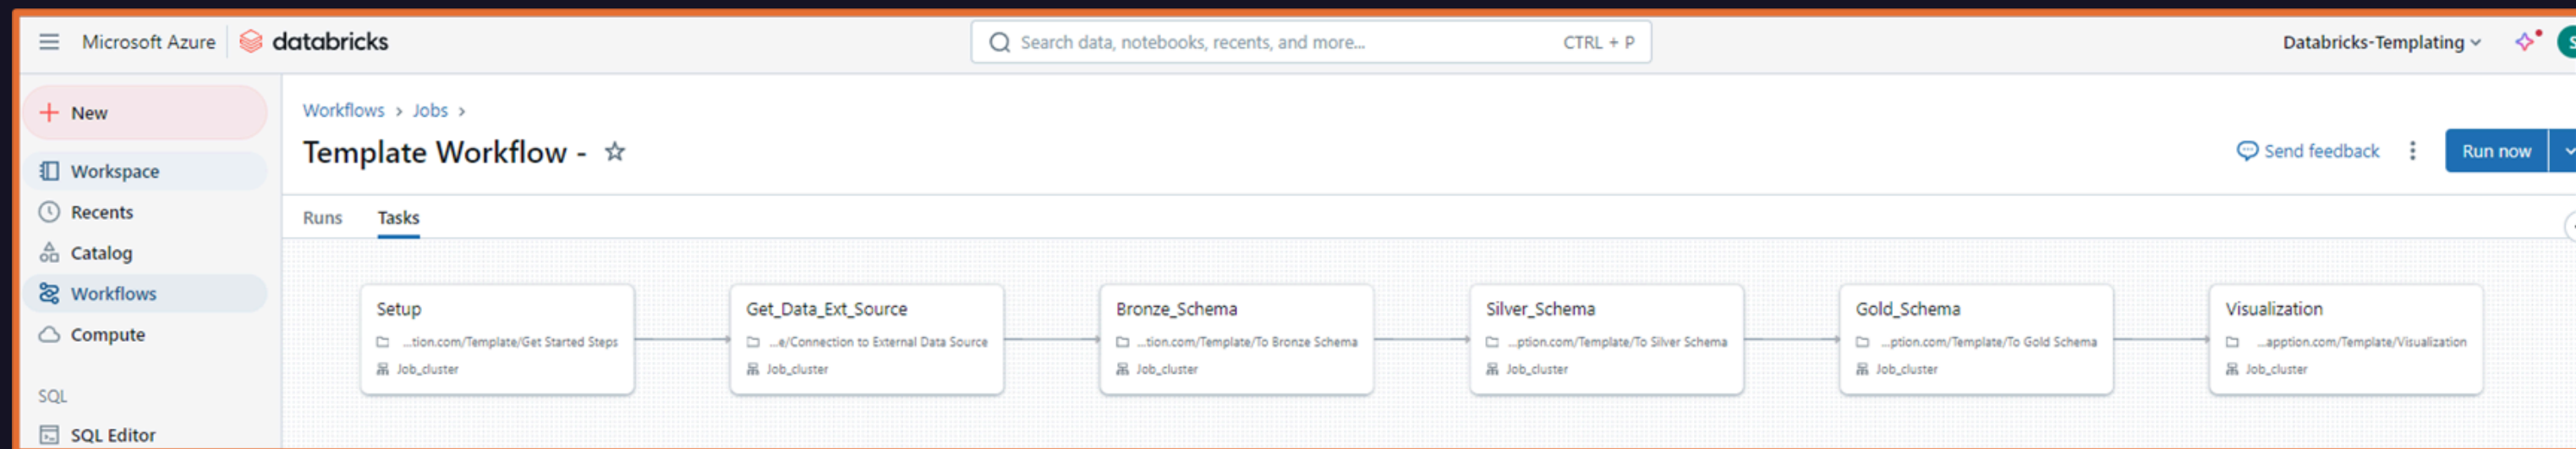

→ Pain Points

- Governance gaps & cost management
- Data quality is often left for production
- Scaling from PoC and development to production environments

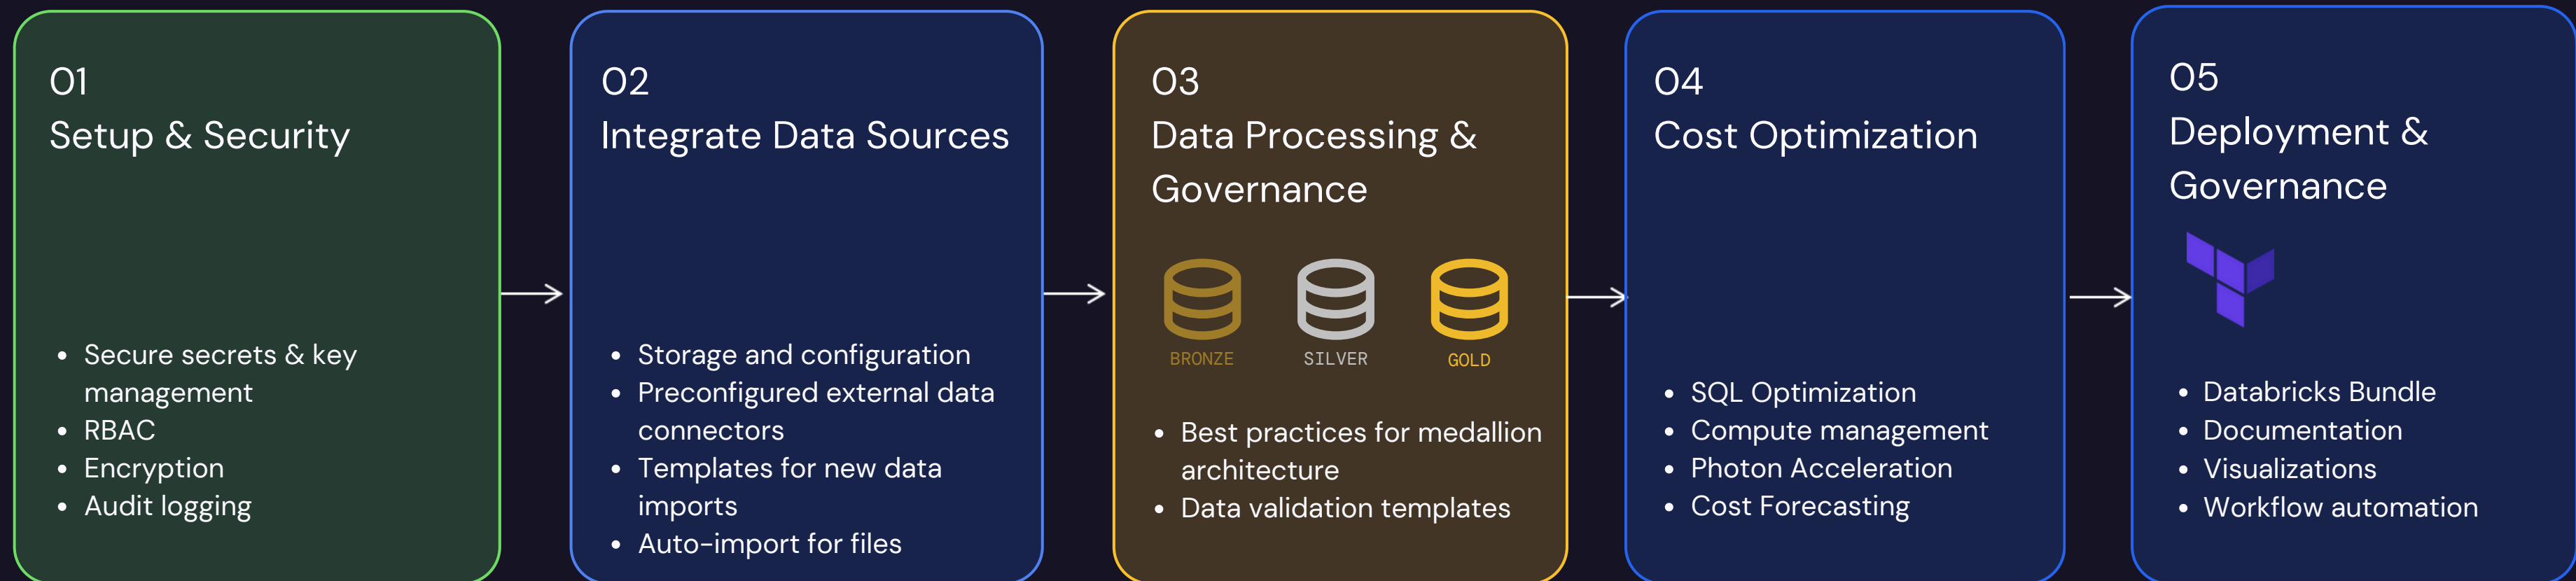

20%–50%

Potential cost savings

*based on saving 1–3 months of engineering hours

5 key components of Apption's Launchpad

Values & Benefits

Speed & Efficiency

Streamlines deployment and onboarding with templates and automation.

Scalability & Security

Role-based access, hidden secrets, and encryption for a secure, production-ready environment.

Training & Onboarding

Designed to simplify training and onboarding of new resources.

Cost Optimization

Optimized compute and storage options, reducing unnecessary expenses.

Accelerate your data and AI initiatives with Apption's Databricks Launchpad.

Contact the Apption team at apption.com/contact to learn how to implement the template for your unique use-case.
